

Acacia Pot O' Gold™

Acacia acinacea low form

A pot of gold is guaranteed with this one. You won't even need a rainbow. It's a mound-shaped, easy-to-grow landscaper's dream, a real must-have. Plant in full sun amongst large rocks, or as a border or low pathway edging; give it good drainage in either clay loams or humus-rich sands and it will reward you with a spring display of golden brilliance that'll make you blink. Trim off the spent flowers later and you'll get a flush of bronze new growth. Cool temperate to sub-tropical and semi-arid climates are suitable. Frost won't worry it and it will be fine by the beach with a bit of protection from really harsh salt winds.

Quick Info:

Genus/Species:

Acacia acinacea low form

Cultivar Name: Pot o Gold

Habit: Dense low mound

Plant Type: Ground Cover

Height (m): 50-100cm

Width (m): none

Frost Tolerance: Medium

Growth Rate: Fast

Position: Full Sun to Part Shade

Flower Information:

Golden ball flowers covering the canopy in spring

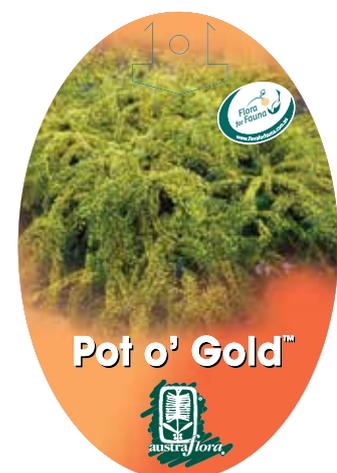

Foliage Information: Small grey-green dense

Cultivation: Well drained to dry clay loam sandy or gravelly soils neutral to low acid pH

Fertiliser: Low P required at around 1.6 %

Climate: Cool temperate sub tropical semi arid; 1st line coastal

Maintenance: Minimal trim to shape if required
