

## Grevillea Tucker Time Cherry Pie™

*Grevillea x G. Elegance selection*

You'll be licking your lips over this one. Luscious ripe-cherry flowers sitting above the finely divided foliage for much of the year invite the honeyeaters in for a feast ~ there's seldom a time when you won't find birds milking the flowers. As a screen to around 2 metres high it's a perfect choice, but it's just as stunning when seen from a distance amongst other shrubs. The shiny red flowers have a huge appeal. Bred in central mid-western Queensland, it does well in the sub-tropical & semi-arid regions; and as it's been trialled in Victoria for many years we know it's happy down south. Well-drained clay or sandy loam is a must; full sun is best, there's no problem with frost, and a good view of the ocean is acceptable.

### Quick Info:

**Genus/Species:**

*Grevillea x G. Elegance selection*

**Cultivar Name:** Cherry Pie

**Habit:** Medium upright dense shrub

**Plant Type:** Medium Shrub

**Height (m):** 150-200cm

**Width (m):** none

**Frost Tolerance:** Medium

**Growth Rate:** Fast

**Position:** Full Sun to Part Shade

**Flower Information:**

Large showy bunches waxy red-pink; Winter-Spring and sporadic

**Foliage Information:** Soft narrowly divided dark green

**Cultivation:** Moist well drained clay loam or sandy gravelly soils

**Fertiliser:** Low P required at around 1.6%

**Climate:** Cool temperate to tropical and semi-arid; 2nd line coastal

**Maintenance:** Trim or prune to shape at regular intervals
