

Grevillea Orange Box™

Grevillea polychroma x juniperina ssp juniperina

From a distance Orange Box™ does have the leaf shape and colour of a traditional box hedge, but the bunches of bright orange bird-attracting flowers throughout the year means that it is a Box for the Birds. Its density suggests shaping as a low to medium height hedge and this can be achieved and maintained without excessive pruning. Orange Box™ adapts to climates ranging from cold temperate to sub tropical or semi arid, in moist well drained clay or sandy loam of a neutral to low acid pH. Very frost hardy and tolerant of second-line coastal conditions. Orange Box™ is particularly attractive in large containers on balconies or decks. Just keep it well trimmed.

Quick Info:

Genus/Species:

Grevillea polychroma x juniperina ssp juniperina

Cultivar Name: Orange Box

Habit: Versatile compact free flowering shrub

Plant Type: Small Shrub

Height (m): 50-100cm

Width (m): none

Frost Tolerance: High

Growth Rate: Medium

Position: Full Sun to Part Shade

Flower Information:

Massed bright orange clusters anytime during the year

Foliage Information: Glossy dark green oval

Cultivation: Moist clay or sandy loam neutral to acid pH

Fertiliser: Low P required at around 1.6 %

Climate: Cold temperate sub tropical; 2nd line coastal

Maintenance: Shape as required may be pruned hard
