

Grevillea Rosy's Baby™

Grevillea rosmarinifolia selection

Rosys Baby™ is the first offspring from the ever popular Rosy Posy™ and shares attributes of compact size, bird attraction and versatility. The soft green bronze-tipped foliage has lantern like flower heads of pink and cream, displayed on the outside of the foliage, nice and easy for honey-eating birds to see their lunch spot throughout winter, spring and early summer. Adaptable to climates ranging from cold temperate, sub tropical to semi arid in well drained clay or sandy loam, neutral to low acid and low alkaline pH soils. Tolerates inland frost and thrives in coastal gardens. As a soft hedge for narrow areas or as a blender in general garden plantings, Rosys Baby™ is one of the new breed of plants developed for the smaller garden.

Quick Info:

Genus/Species:

Grevillea rosmarinifolia selection

Cultivar Name: Rosy's Baby

Habit: Small soft dense free flowering shrub

Plant Type: Small Shrub

Height (m): 50-100cm

Width (m): none

Frost Tolerance: High

Growth Rate: Fast

Position: Full Sun to Part Shade

Flower Information:

Bunches of waxy pink & cream flowers clustered along stems early winter spring early summer

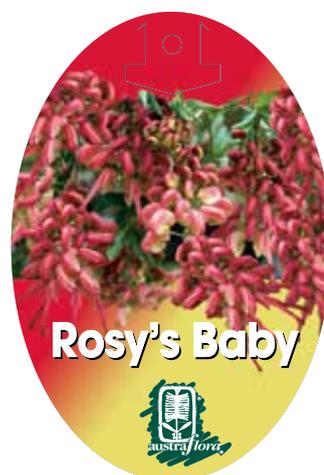

Foliage Information: Soft shiny green bronze new growth

Cultivation: Well drained clay or sandy loam or gravelly soils neutral to acid pH

Fertiliser: Low P required at around 1.6 %

Climate: Cold temperate sub tropical or semi arid; 2nd line coastal

Maintenance: Minimal trim to shape if required
