

## Callistemon Rosy Morn™

*Callistemon aff pallidus*

Rose-pink & silver are such an Aussie dawn combo. If you want to echo it in the garden, scatter some Rosy Morn™ amongst other shrubs, or better still, create a low hedge that you can keep trimmed. Regular clipping will maintain a continual flush of silver new growth. The pink-&-silver flowerbuds emerge in early spring ~ you'll find yourself popping back often to watch the bracts as they colour up. Suddenly, the first brush opens in the warmth of late spring, and within a week the entire bush is a ball of rose, silver and pale green. A sunny spot, well drained to moist soils of clay loam or sand (neutral to acid pH), in cool to warm climates, will suit Rosy Morn™ very well. Frost is no problem and a moderately sheltered coastal situation is fine. Prune hard after flowering finishes, and your silver-&-rose-pink picture is assured.

### Quick Info:

**Genus/Species:**

Callistemon aff pallidus

**Cultivar Name:** Rosy Morn

**Habit:** Small dense multi-stemmed shrub

**Plant Type:** Small Shrub

**Height (m):** 100-150cm

**Width (m):** none

**Frost Tolerance:** Medium

**Growth Rate:** Medium

**Position:** Full Sun to Part Shade

**Flower Information:**

Upright misty-purple brushes in spring follow buds covered with striking red bracts

**Foliage Information:** Grey green purple tinged silky new growth

**Cultivation:** Moist clay loam or sandy soils neutral to acid pH

**Fertiliser:** Low P required at around 1.6 %

**Climate:** Cool temperate to sub tropical; 2nd line coastal

**Maintenance:** Cut off spent flower or prune to shape for hedging
