

## Darwinia Seaspray™

*Darwinia citriodora prostrate form*

When Seaspray™ is battered with salt-laden rain or wind in its natural habitat, it just shakes its leaves and gets on with what it does best, being an attractive small groundcover or container plant. It has lemon-scented silvery-green foliage and unusual orange & red flowers from winter through to summer. Seaspray™ grows to around 15-30cm high and 50-90cm across and shows to great effect on path edges or amongst bold rock work, and of course as a container plant for decks, patios and courtyards. Suited to dry gravelly or well drained clay loam in cool temperate to semi arid and sub tropical climates and will tolerate moderate frost exposure.

### Quick Info:

**Genus/Species:**

*Darwinia citriodora prostrate form*

**Cultivar Name:** Seaspray

**Habit:** Low spreading groundcover or mound

**Plant Type:** Ground Cover

**Height (m):** 0-50cm

**Width (m):** none

**Frost Tolerance:** Medium

**Growth Rate:** Medium

**Position:** Full Sun to Part Shade

**Flower Information:**

Orange-red bell flowers winter spring summer

**Foliage Information:** Soft silver-mauve aromatic dense

**Cultivation:** Moist well drained or dry clay or sandy loam neutral to low acid pH

**Fertiliser:** Low P required at around 1.6 %

**Climate:** Cool temperate to sub tropical; 1st line coastal

**Maintenance:** Minimal tip pruning late summer early autumn
