

## Eucalyptus Viridis Winter Light™

*Eucalyptus viridis dwarf*

While you may seek privacy screening on the sunny side of your home, you may also want to take advantage of what light is available in winter ~ so in steps Winter Light™. While the long fine openly spaced leaves will effectively block out the sun's rays on hot days, they allow light to filter through in winter, without diminishing its screening potential. A fine clean trunk adds to the feeling of lightness, while the foliage is all but hidden by nectar-rich white blossom in summer and autumn ~ which makes honey-eating birds happy residents. Winter Light™ will grow in a range of climates from cool temperate to sub tropical and semi arid, in well drained clay or sandy loam. Tolerates frost and near coastal sites. A very useful small tree for shelter belts and broad acre windbreaks.

### Quick Info:

**Genus/Species:**

*Eucalyptus viridis dwarf*

**Cultivar Name:** Winter Light

**Habit:** Small narrow tree

**Plant Type:** Small Tree

**Height (m):** 5-10m

**Width (m):** none

**Frost Tolerance:** Medium

**Growth Rate:** Medium

**Position:** Full Sun to Part Shade

**Flower Information:**

Massed clusters of cream flowers during early summer-autumn

**Foliage Information:** Smooth clean trunk with short stocking of bark; foliage narrow & pendulous

**Cultivation:** Clay or sand; neutral to acid pH

**Fertiliser:** Low P required at around 1.6%

**Climate:** Cool temperate to sub tropical & arid climates

**Maintenance:** Feed with low phosphorus native fertilizer early spring or late summer
