

Grevillea Canterbury Gold™

Grevillea victoriae x juniperina prostrate form

Some plants get sidelined by more flamboyant arrivals, but when the dry times are upon us Canterbury Gold™ shines and its adaptability comes into its own. Pure Gold, its a medium soft-foliaged arching shrub suitable as a dense mounding groundcover, or a traffic directional screen in commercial and carpark landscapes. Used very effectively on freeway slopes and batters. Wherever it grows, its bunches of golden nectar-rich flowers are a focus for hungry birds throughout the year. Suited to cold temperate to sub tropical and semi arid climates in moist well drained clay and sandy loams of a neutral to low acid pH. Very frost hardy, and very reliable in coastal gardens.

Quick Info:

Genus/Species:

Grevillea victoriae x juniperina prostrate form

Cultivar Name: Canterbury Gold

Habit: Dense spreading groundcover

Plant Type: Ground Cover

Height (m): 100-150cm

Width (m): none

Frost Tolerance: Medium

Growth Rate: Fast

Position: Full Sun to Part Shade

Flower Information:

Bunches of gold flowers throughout the year

Foliage Information: Soft grey-green dense

Cultivation: Moist well drained clay loam or sandy soil neutral to low acid pH

Fertiliser: Low P required at around 1.6 %

Climate: Cool temperate sub tropical semi arid; 1st line coastal

Maintenance: Minimal shape as required for hedging
