

Grevillea Carpet Crawl™

Grevillea rivularis x *G. Fanfare*

Carpet Crawl™ has one of those self-evident names. Its low & spreading, durable & attractive. With a 2-3 m spread but a height of only around 50 cm its a great low hedging plant, adding to its main function as a dense, moisture-conserving ground cover. The deeply divided bronze-red foliage displays great patterns on the ground and is wonderfully effective as a curtain hanging down vertical walls or steep slopes. Nectar-rich toothbrush flowers of deep purple-red and pink keep the birds coming back throughout the year. Happy in cool temperate to sub tropical climates in moist but well drained clay or sandy loam of a neutral to low acid pH, in inland frosty areas or on the coast.

Quick Info:

Genus/Species:

Grevillea rivularis x *G. Fanfare*

Cultivar Name: Carpet Crawl

Habit: Spreading groundcover

Plant Type: Ground Cover

Height (m): 50-100cm

Width (m): none

Frost Tolerance: Medium

Growth Rate: Fast

Position: Full Sun to Part Shade

Flower Information:

Purple-red & pink toothbrush flowers at most times of the year

Foliage Information: Deeply divided bronze-red

Cultivation: Moist well drained clay loam or sandy soil neutral to acid pH

Fertiliser: Low P required at around 1.6 %

Climate: Cool temperate to sub tropical; 2nd line coastal

Maintenance: Minimal prune to shape as required
